- Programming Languages: JavaScript; C#
- Web/Server Technology: SQL; LinQ; Git; AJAX; JSON
- Frameworks: AngularJS; ASP.NET MVC
- Markup Languages/Libraries: HTML; CSS; Bootstrap; jQuery; Razor
- Software: Visual Studio; Microsoft SQL Server; Microsoft Office
- Operating Systems: Windows Vista/7/8
- Administrative: Invoicing; Data entry; Correspondence; 40+WPM

EXPERIENCE

CoderCamps	Pearland, TX
STUDENT/INTERN	03/14 – 05/14

Basic Programming in JavaScript, HTML/CSS

- Completed functional To-Do-List and Quiz web application utilizing both multidimensional arrays and objects within arrays

Intermediate JavaScript, Ajax, and APIs

- Created web application to perform CRUD operations on JSON files being retrieved via AJAX calls from a RESTful back-end database (Firebase)

Introduction to AngularJS and MVC

- Gained fundamental understating of MVC design via Angular JS/Razor/ASP.NET

Introduction to C# and Object Oriented Programming

- Established firm know-how of object oriented design/programming, user stories and C# while building out small web projects

Data Models and Persistence

- Built a blog application centered upon OOP/OOD and the Entity Framework to seed data

into a SQL database and perform CRUD operations using LinQ

Full Stack Development/Group Project

- Assisted in the development of a proprietary project applying all the technologies acquired while at camp to solidify understanding and skill
- Project consisted of a frontend (HTML/CSS/Bootstrap/AngularJS) that provided dynamic views and made AJAX calls to acquire data from a backend (C#/SQL/LinQ/ASP.NET/Entity & Identity Framework) via a WebAPI

Nippon Express

Houston, TX

Air Import Coordinator
